## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, and 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coates (US Patent 5,059,196) in view of Vinciguerra et al. (US Patent 5,554,158). Coates discloses a device for implantation of a prosthesis comprising an elongated housing (26), a condylar engagement member at the end of the housing (bottom portion proximate to 64) wherein the condylar engagement portion has two surfaces and an aperture/space between them. Coates further discloses a post (72/74) that extends through the condylar engagement members (see Fig. 1) that further comprise a flange (80/82), and that further comprises a breadth. The flange and post are capable of being rotated (see top of Fig. 1) that are fully capable of obtaining at least two orientations, enabling a condylar engagement to be attached to a first and second condylar portions.

Coates discloses the claimed invention except for, more specifically, a passage extending through the housing. Vinciguerra et al. discloses a prosthetic engaging device having a hollow passageway (22) that allows the base and post/condylar portions to be actuated directly from the user end and facilitate operation by the surgeon (See Col. 1, lines 47-66). It would have been obvious to one having ordinary skill in the art at the

time the invention was made to construct the device of Coates having at least a hollow passageway in view of Vinciguerra et al. to better operation and actuate the device.

***Response to Arguments***

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

***Allowable Subject Matter***

Claims 15-19 are allowed.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
